

# Taking reversed phase chiral separations to a new level – Kromasil® CelluCoat™ RP

Designed to give you a highly efficient chiral stationary phase for reversed phase chiral chromatography. No pressure limits\* and the unique 3 µm particles enable fast, efficient and high resolution analyses. Kromasil CelluCoat RP is based on the same in-house developed silica matrix and the same selector, tris-[3,5-dimethylphenyl] carbamoyl cellulose as Kromasil CelluCoat.
